

JOB TITLE: STRUCTURAL DESIGNER

The future of Structural Focus lies with our employees. We seek highly qualified and motivated individuals to continue our success. Our team is given the opportunity to learn and practice all aspects of engineering, and it is our excellent management staff that provides the help and guidance along the way. We encourage questions and thoughtful discussion. And in our collegial atmosphere, you will receive the attention you need and be given the responsibility that you desire. We put a major emphasis on continuous training for our employees, and with a nearly 1:1 ratio of licensed structural engineers to other engineering staff, Structural Focus has an excellent environment to grow in and be mentored by experienced professionals.

A Structural Designer at Structural Focus provides technical services on projects while continuing with personal growth in technical and professional areas.

REQUIRED QUALIFICATIONS

1. BS degree in Civil or Structural Engineering.
2. Technical competence with demonstrated knowledge of fundamental engineering principles and the ability to take and apply direction from senior technical staff.
3. Ability to participate in site visits and site structural observations. May require climbing ladders or scaffolding, entering areas with limited egress, confined spaces with limited height/width, or walking long distances.

PREFERRED QUALIFICATIONS AND EXPECTATIONS

- MS degree in Structural Engineering.
- Active participation in professional activities related to structural or earthquake engineering.
- Structural engineering technical experience, or research related to structural engineering.
- Experience in general engineering practice or in business development.
- Certified as Engineer-in-Training.
- Able to understand assigned task requirements and perform the necessary engineering computations.
- Ability to double check engineering results with different means.
- Ability to make necessary engineering analysis assumptions and understand the implications of the assumptions made.
- Capable of identifying the technical resources necessary to perform assigned engineering tasks.
- Understand the level of effort required at each stage of design, including the necessary steps to prepare a set of construction drawings.
- Ability to prepare clear and professional sketches.

COMPENSATION AND BENEFITS

- \$5,500- \$ 8,000 monthly
- Medical Coverage including employee and family health insurance, dental, long-term disability, long-term care and life insurance coverage
- 401K plan available for your participation, as well as a profit- sharing plan based on the firm's profitability
- Assistance with your Continuing Education, including eight hours of paid time per year and payment of all approved seminar and conference registration fees, as well as professional licensing fees.
- Vacation and sick leave are combined into paid time off.
- Eight holidays off per year: seven major holidays plus one floating day off.
